

25th March 2020

As you will be aware from the continuing government updates and the Prime Minister's Brief on Monday 23rd March, the advice now is for all non-essential businesses to close, to reduce human interaction and to slow the transmission rates of Covid-19.

With many of our customers and suppliers already in this position and to protect the welfare of our staff, we have taken the decision to close our factories with immediate effect.

We will have a skeleton staff on-site to facilitate collections of retail sold residential homes required to move this week, to avoid leaving vulnerable people potentially homeless, and also, to arrange equipment to enable key staff to work from home. All staff on-site will be asked to maintain social distancing and hand washing protocols.

All three of our group sites will be on full lockdown as soon as practically possible this week.

Our Showground facilities at Brandon and Hull are closed with immediate effect until further notice.

We will continue to monitor government advice and guidance and as a result of this, update our ongoing position on our website.

Please accept our apologies for any inconvenience caused during these unprecedented times, we look forward to safely resuming our service at the earliest opportunity.
