

## Coronavirus (Covid-19) Update 5<sup>th</sup> November 2020

As you will be aware from the continuing government updates, the country has now gone into a second lockdown to reduce human interaction and to slow the transmission rates of Covid-19.

Manufacturing businesses have been advised they should remain open where possible. **It is our aim to remain operational, subject to our inbound material supply chain and our internal operational capability.**

We have contacted our suppliers and have received assurances that they intend to remain open, so we believe that material supply should allow us to continue production.

Our operational capability also revolves around protecting our team from Covid-19, so we have taken further social distancing measures; **this includes minimising visitors to all three of our sites for the next four weeks.**

It is our intention to build and deliver all customer orders over this time; we will be in contact to discuss individual requirements.

Please accept our apologies for any inconvenience caused and we thank you for your support during this difficult time. We look forward to safely resuming our normal service at the earliest opportunity.
